

# InsightKIDS™

Intelligent . Innovative . Inspiring

## INSIGHTKIDS COMPLETE BRAIN READING AND CREATIVE WRITING PROGRAM®

This program utilises both the phonics and word recognition methods to ensure that your child learns to read quickly, even with various learning styles. Lessons are fun and interactive with music, movement, puppets and more!

Children who have mastered strong reading skills can then progress to the **INSIGHTKIDS LITERATURE AND CREATIVE WRITING PROGRAM** that encourages creativity while teaching grammar and strong writing skills.

They will be exposed to literary giants such as Shakespeare, Twain and many more through the exciting sessions. Help your child develop a zest for the English language!

- \* Innovative and effective method to teach children how to read through both the left and right brain.
- \* Utilizes both phonics and the word recognition method.
- \* Customised to suit each child's learning and thinking styles based on their brain dominance to optimize learning.
- \* Reading and writing skills are taught through Jolly Phonics and Oxford Reading Tree, award-winning literacy programs from the UK.
- \* Fun and interactive teaching incorporating music, puppets, action and word games.
- \* Studies find that after one year, children taught Jolly Phonics have an average reading age of around 12 months ahead of their actual age.

## TESTIMONIAL

"Just after a year at InsightKIDS, Keith is now able to read a 30-page book by himself with minimal guidance, for example, a Stage 7 Oxford Reading Tree Book. We are hugely impressed because his reading ability has been independently assessed as being at least 1 ½ yrs ahead of his age! The program is not just instructional but participative as he gets to role-play the stories. We are so convinced that the InsightKIDS Reading Program provides the right foundation to develop an early interest in reading that we have now signed up our younger son, Leo, at 3½ years old."

Lorraine Lee, mother to Keith Poon (5)
